Chapter 1

Class Index

1.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

BinarySearchTree	5
BSTNode	5
DoublyLinkedList	6
DoublyLinkedListNode	6
SinglyLinkedList This class is an implementation of data structure SinglyLinkedList	7
SinglyLinkedListNode This class is an implementation of SinglyLinkedListNode	8
Trie	8

Chapter 2

File Index

2.1 File List

Here is a list of all documented files with brief descriptions:

DSA.cpp	This file talks about some data structures implementations	9
-------------------------	--	---

Chapter 3

Class Documentation

3.1 BinarySearchTree Class Reference

Public Types

- enum **order** { **PRE** , **IN** , **POST** }

Public Member Functions

- void **insert** (ll val)
- void **traverse** ([BSTNode](#) *T, order tt)
- ll **height** ([BSTNode](#) *T)

Public Attributes

- [BSTNode](#) * **root**

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

3.2 BSTNode Class Reference

Public Member Functions

- **BSTNode** (ll val)

Public Attributes

- `ll info`
- `ll level`
- `BSTNode * left`
- `BSTNode * right`

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

3.3 DoublyLinkedList Class Reference

Public Member Functions

- `void insert (ll data)`
- `void printer (string sep=", ")`
- `void reverse ()`

Public Attributes

- `DoublyLinkedListNode * head`
- `DoublyLinkedListNode * tail`

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

3.4 DoublyLinkedListNode Class Reference

Public Member Functions

- `DoublyLinkedListNode (ll val)`

Public Attributes

- `ll data`
- `DoublyLinkedListNode * next`
- `DoublyLinkedListNode * prev`

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

3.5 SinglyLinkedList Class Reference

this class is an implementation of data structure [SinglyLinkedList](#)

Public Member Functions

- void [insert](#) (ll data)
Brief description. Brief description continued.
- [SinglyLinkedListNode](#) * **find** (ll data)
- bool **deleteVal** (ll data)
- void **printer** (string sep=", ")
- void **reverse** ()

Public Attributes

- [SinglyLinkedListNode](#) * **head**
- [SinglyLinkedListNode](#) * **tail**

3.5.1 Detailed Description

this class is an implementation of data structure [SinglyLinkedList](#)

this class creates nodes by [SinglyLinkedListNode](#) and links them to form singly linked list

See also

[insert\(\)](#)

3.5.2 Member Function Documentation

3.5.2.1 insert()

```
void SinglyLinkedList::insert (  
    ll data ) [inline]
```

Brief description. Brief description continued.

Detailed description starts here.

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

3.6 SinglyLinkedListNode Class Reference

this class is an implementation of [SinglyLinkedListNode](#)

Public Member Functions

- **SinglyLinkedListNode** (ll val)

Public Attributes

- ll **data**
- [SinglyLinkedListNode](#) * **next**

3.6.1 Detailed Description

this class is an implementation of [SinglyLinkedListNode](#)

this class creates nodes which are singly linked to form a singly linked list

See also

[SinglyLinkedListNode](#)

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

3.7 Trie Class Reference

Public Member Functions

- bool **find** ([Trie](#) *T, char c)
- void **insert** (string s)
- bool **checkPrefix** (string s)
- ll **countPrefix** (string s)

Public Attributes

- ll **count**
- map< char, [Trie](#) * > **nodes**

The documentation for this class was generated from the following file:

- [DSA.cpp](#)

Chapter 4

File Documentation

4.1 DSA.cpp File Reference

this file talks about some data structures implementations.

```
#include <bits/stdc++.h>
```

Classes

- class [SinglyLinkedListNode](#)
this class is an implementation of [SinglyLinkedListNode](#)
- class [SinglyLinkedList](#)
this class is an implementation of data structure [SinglyLinkedList](#)
- class [DoublyLinkedListNode](#)
- class [DoublyLinkedList](#)
- class [BSTNode](#)
- class [BinarySearchTree](#)
- class [Trie](#)

Macros

- `#define ll long long int`
- `#define vi vector<int>`
- `#define vll vector<ll>`

Functions

- `ostream & operator<< (ostream &out, const SinglyLinkedListNode &node)`
- `SinglyLinkedList merge (SinglyLinkedList list1, SinglyLinkedList list2)`
- `ostream & operator<< (ostream &out, const DoublyLinkedListNode &node)`
- `ostream & operator<< (ostream &out, const BSTNode &node)`

4.1.1 Detailed Description

this file talks about some data structures implementations.

Author

: sohith

Date

: 21/09/22

this file contains implementation of 7 following mentioned data structures:

1. [BinarySearchTree](#)
2. [BSTNode](#)
3. [DoublyLinkedList](#)
4. [DoublyLinkedListNode](#)
5. [SinglyLinkedList](#)
6. [SinglyLinkedListNode](#)
7. [Trie](#)
